

Federation of Galaxy Explorers

St Veronica Church School
3460 Centreville Rd, Chantilly, VA

Moon Base Summer Camp for grades 3 and 4
July 16-20

Mars Base Summer Camp for grades 5 and 6
July 23-26

Moon Base and Mars Base summer camps are one-week, co-ed day camps that introduce children to space exploration in a dynamic and tangible environment. Spend the week training like an astronaut to create the first permanent outpost off our home planet! Either on the Moon or Mars, learning how to live in a space base takes planning and is fun!

Wear spacesuits, test meteor impact craters, design your own Lunar habitat, grow your own space plants, run simulations in Mission Control and the Moon Base, and launch rockets!

Camp staffers are teachers, scientists, and engineers with experience in a wide variety of space-related science and engineering fields.
